Advanced ATT Provider Course
Assessment and Treatment of Trauma

Saturday 8am-5:30pm
February 13th, 2010

Assessment and Treatment of Trauma (ATT) is a new international continuing education course from the American Academy of Orthopaedic Surgeons (AAOS) that represents the state-of-the-art in prehospital trauma assessment and management. Based on the most current medical information and best practices, this concise and highly interactive continuing education course covers the critical knowledge and skills necessary to rapidly evaluate, stabilize, and transport the trauma patient.

ATT offers students an engaging course that expands their knowledge of trauma concepts and promotes critical thinking through case-based learning, hands-on skills stations, live-action video, and small group scenarios. Innovative student resources that include a Precourse Online Module and ATT Audio Book allow students to experience true hybrid learning. The flexible structure of ATT and adaptable teaching materials reflect the notion that providers should "train like they work and work like they train" and will enable instructors to offer the most dynamic trauma course on the market.

Participants are required to successfully complete the 2-hour Precourse Online Module before attending the On-Site Module. Upon successful completion, participants are asked to print a completion certificate to present to the Course Coordinator at the On-Site Module.

More info at www.attrauma.com
