WHO WE ARE !!!
The North Shore/LIJ Center for Emergency Medical Services is part of the North Shore/LIJ Health System, the third largest non-profit, secular health system in the United States and the largest healthcare network in New York State. The system is comprised of 14 hospitals (including three world-class tertiary hospitals as well as a nationally recognized children's hospital and a psychiatric facility), hospice and home care services, a major medical research institute and many other health-related facilities. In addition, North Shore-LIJ is partnering with Hofstra University to develop a new medical school. The Center for Emergency Medical Services is the largest hospital-based ambulance service in the East, with over 60 EMS vehicles and over 300 EMTs and Paramedics. The EMS System operations include the Interfacility Transport Division, New York City 911 Division, Critical Care Transports, Network Emergency Management, and a state-of-the-art Communications Center. All aspects of CEMS come together to provide EMS services to the community and making over 70,000 patient contacts per year.

CRITICAL CARE TRANSPORT
May 18th through June 19th, 2010
Final Testing June 22nd, 2010

Module A: Critical Care Environment
- Concepts and Components of a Critical Care team
- Medical/Legal Aspects of Critical Care Transport
- Laboratory Data Interpretation
- Shock
- Multi-System Organ Failure
- Infection Control
- Communicable Diseases
- Transports: Start to Finish

Module B: Breathing Management
- Breathing Assessment
- Pulmonary Physiology
- Pleural Decompression
- Chest Tubes
- Portable Ventilators
- Endotracheal Tube
- Tracheal Suctioning
- Rapid Sequence Induction (Intubation)

Module C: Surgical Airway Management
- Tracheostomies
- Needle Cricothyrotomy
- Surgical Cricothyrotomy
- Retrograde Intubation

Module D: Hemodynamic Management
- Invasive Lines
- Hemodynamic Monitoring
- Blood Administration

Module E: Cardiac Management
- 12-Lead Electrocardiography
- Implantable, Cardioverter- Defibrillators
- Cardiac Pacemakers
- Intra-Aortic Balloon Pumps

Module F: Pharmacological Management
- Sedatives
- Analgesics
- Paralytics
- Antihypertensives
- Volume Expanders
- Vasoressors
- Bronchodilators
- Antiarrhythmics
- Antianginals
- Thrombolitics
- Anticoagulants
- Pharmaceutical Calculations

Module G: GI, GU and Renal Management
- GI, GU and Renal Assessment
- NG and OG Feeding Tubes
- Urinary Catheters
- Ostomies
- Hemodialysis and Peritoneal Dialysis
- Rectal Considerations

Module H: Neurological Management
- Neurological Assessment
- Intracranial Pressure (ICP) Monitoring

Module I: Transport Considerations
- Aeromedical Physiology
- Case Studies

Module J: Special Considerations
- Pediatric Considerations
- Obstetrical Considerations
