Course Spotlights and Schedule

ADVANCED ACTIVE SHOOTER SCENARIO- COMMAND (A2S2)
PILOT DELIVERY
Course: A2S2-Command
September 29, 2010
8:30 AM- 4:30 PM
Location
State Preparedness Training Center
104 Hangar Road Oriskany, NY 13424

Incident Management/Unified Command for Terrorism and CBRNE
Incidents
Course: MGT-313
September 28-30, 2010
8:00 AM- 5:00 PM
Location
Holiday Inn
1777 Burrstone Rd New Hartford, NY 13413

= Lodging provided.

(You are only eligible for lodging if your residence and official work station are more than 50 miles from the training center and you are a State or Local Agency First Responder from New York.)
For additional information, you may go to our website at: http://www.security.state.ny.us/training/training_calendar.php

Medical Management of CBRNE Events PER-211  
**COURSE FULL-WAIT LIST ONLY**  
Westchester Medical Center, Valhalla, NY  
9/21-22/2010  8:00 AM – 5:00 PM

Participants completing this program will be able to properly perform patient triage, decontamination, treatment and transportation in the event of exposure to chemical, biological, radiological, nuclear and explosive (CBRNE) weapons. The course consists of facilitated discussions, small group exercises, hands on activities and task orientated practical applications. Course participants will use both state-of-the-art adult and pediatric human patient simulators to promote critical thinking skills while utilizing RAPID- Care concept.

Incident Response to Terrorist Bombings AWR-130  
Rockland County Police & Public Safety Academy, Ponoma, NY  
9/21/2010  8:30 AM – 2:30 PM

This course provides basic instruction on response procedures for terrorist incidents involving energetic materials (explosives and incendiaries). The course includes classroom presentations that address potential terrorist bombing targets in US communities, common military and commercial explosives available to terrorists, improvised explosive devices (IED’s) and response procedures that support safe and effective operations during bombing incidents.

Initial Law Enforcement Response to Suicide Bombing Attacks (ILSERBA)  
Rockland County Police & Public Safety Academy, Ponoma, NY  
9/21-22/2010

This Program is for Sworn Law Enforcement Personnel only

This course was developed by New Mexico Institute of Mining and Technology, a National Domestic Preparedness Consortium member who has also developed public safety training courses such as; “Incident Response to Terrorist Bombings” (IRTB) and “Prevention and Response to Suicide Bombing Incidents” (PRSBI).

This eight-hour course is designed to provide front line law enforcement officers with the skills and knowledge to effectively interdict and respond to an imminent person-borne suicide bombing attack or an attack involving a vehicle-borne IED.

| = Lodging provided.

*(You are only eligible for lodging if your residence and official work station are more than 50 miles from the training center and you are a State or Local Agency First Responder from New York.)*

Advanced CAMEO Applications for all Hazards MGT-320
Radisson Hotel, Utica, NY  
9/21-23/2010  
8:00AM – 5:00 PM

CAMEO is a system of software applications used to plan for and respond to chemical emergencies and WMD incidents. It is a tool developed by the EPA’s Chemical Emergency Preparedness and Prevention Office (CEPPO) and the National Oceanic and Atmospheric Administration (NOAA) to assist front-line emergency planners and responders. The CAMEO system integrates a chemical database and a method to manage the data, an air dispersion model and a mapping capability sharing critical information in a timely fashion. Participants are expected to incorporate their knowledge of CAMEO into planning and responding to WMD scenarios and classroom exercises presented during the course.

Incident Management/Unified Command for Terrorism and CBRNE Incidents MGT-313
Holiday Inn, New Hartford, NY  
9/28-30/2010  
8:00AM – 5:00 PM

This course trains emergency response supervisors and managers in the skills necessary to effectively plan for and manage a WMD (Weapons of Mass Destruction) CBRNE (Chemical, Biological, Radiological, Nuclear and Explosive) terrorism incident by applying the all-hazards command and management structures found in the NIMS (National Incident Management System) with emphasis on the ICS (Incident Command System), multi-agency coordination systems and public information systems. The course uses a multidiscipline jurisdictional team-building approach to accomplish the learning objectives. Upon course completion, participants will possess a working knowledge of local, state, and federal agency roles and responsibilities and their integration into a unified command for managing terrorism and CBRNE incidents; as well as other incidents of national significance such as hurricanes or mass causality incidents.

Advanced Active Shooter Scenario- Command A2S2
LIMITED SEATING
State Preparedness Training Center, Oriskany, NY  
9/29/2010  
8:30AM – 4:30 PM

The A2S2 Command & Planning Course will help local, state, and federal emergency response agencies and jurisdictional leaders to develop a better understanding of the scope, issues, and complexities that would likely be applicable to a jurisdiction’s response to a complex active shooter scenario situation such as occurred in Mumbai, India, involving multiple targets, multiple attack teams, use of firearms and explosives, and the siege spanning greater than 24 hours. The course will help the participants develop an appreciation for the complexities involved in a large scale active shooter siege as well as the consequences related to multiple casualties with gunshot and/or post blast injuries (> 100, as well as multiple fatalities (> 100). In addition, it will help participants to better understand the various supportive needs that will be required in defeating the attackers,

Phone: (518) 485-9453  ■ Email: training@security.state.ny.us
minimizing responder casualties, and sustaining a long term operation. Although this course is not intended to be an “incident command course,” it will provide an opportunity for the participants to discuss the issues related to potential multiple tactical incident commands and the overall jurisdictional coordination of these commands. It is important to understand that this course is NOT intended to deal with specific tactics or specific problems. It is intended to help participants form an approach/strategy that will result in the potential development of the preparedness capability by that jurisdiction for such an incident, through collaboration, sharing, and related mutual assistance processes.

October 2010

Field Force Extrication Tactics- PER-202 (FFE)
COURSE FULL-WAIT LIST ONLY
State Preparedness Training Center, Oriskany, NY
10/5-7/2010 8:00AM – 5:00PM

This training course is designed to provide instruction for law enforcement officers, fire service command and emergency management officials who direct others in the planning and response phase of a civil incident or protest event. The training culminates with a command post exercise applying concepts discussed during the course.

Soft Target Awareness Training for Facility Managers, Supervisors and Security and Safety Personnel
Erie County Fire Training Academy, Cheektowaga, NY
10/7/2010 8:30 AM – 12:30 PM

This four hour Soft Target Awareness Course is designed to provide facility managers, supervisors, and security and safety personnel with a venue to receive and share baseline terrorism awareness, prevention, and protection information. Additionally, the course is intended to enhance individual and organizational security awareness. Participants gain insight as to why it is important to engage in proactive security measures and become better able to define their roles in deterring, detecting, and defending their facilities from terrorist activity. The last two modules focus on providing an overview of the Homeland Security Advisory System (HSAS), identifying where their facilities’ security measures are on the HSAS, discuss increasing measures associated with HSAS, and what they should do in terms of response and recovery activities if attacked. These two modules are designed as classroom instruction with instructor facilitated group discussion.

WMD- Tactical Operations (PER-221)
Sullivan County Emergency Services Training Center, Swan Lake, NY
10/18-22/2010 8:00 AM – 5:00PM

This tactical operations course is designed to prepare tactical law enforcement teams to perform their functional roles during tactical operation involving terrorist use of Weapons of Mass Destruction (WMD). Participants are expected to

= Lodging provided.

(You are only eligible for lodging if your residence and official work station are more than 50 miles from the training center and you are a State or Local Agency First Responder from New York.)

For additional information, you may go to our website at: http://www.security.state.ny.us/training/training_calendar.php
Phone: (518) 485-9453 Email: training@security.state.ny.us
incorporate appropriate actions, required by the complexities and uniqueness of a WMD incident, into individual actions and team tactical objectives. Course content is supported by a comprehensive analysis that includes data from tactical operations organizations and WMD subject matter experts. Training activities include both classroom instruction and hands-on practical exercises that require tactical police operations in a WMD environment. Topics include; threat, WMD agents, monitoring/detection equipment, PPE, tactical decontamination, medical monitoring requirements and tactical imperatives associated with performance in contaminated environments.

**WMD: Threat and Risk Assessment MGT-310**

State Preparedness Training Center, Oriskany, NY  
10/19-20/2010  
8:00AM – 5:00 PM

This Planning/Management level course prepares emergency responders, managers and community leaders to conduct comprehensive, capabilities based threat and risk assessments for a Weapons of Mass Destruction (WMD) terrorism/all-hazards incident under the National Response Framework and Presidential Directives. Participant’s activities focus on the jurisdictional process for determining the ability to respond to CBRNE/ All Hazard events and the development of the needs assessment to fill gaps identified within the solution areas. The assessment incorporates the State Homeland Security and Strategy (SHSAS) processes.

**Protective Measures Training for Security Officers, Mid-Level Safety/Security Supervisors and Property Managers**

Erie County Fire Training Academy, Cheektowaga, NY  
10/25-26/2010  
8:30 AM – 4:30 PM

This two day Protective Measures course offered to security officers, mid-level safety/security supervisors, and property managers in public/private sectors is designed to provide students with the knowledge to identify vulnerabilities and select appropriate Protective Measures for their unique facility. The course focuses on providing information pertaining to common vulnerabilities, available Protective Measures, and strategies for selecting appropriate Protective Measures. Students spend 16 hours in the classroom during which time instructors present information and students participate in various in-class activities and practical exercises designed to reinforce learning.

**SLATT- Anti-Terrorism Workshop for Campus Law Enforcement**

John Jay College of Criminal Justice, New York, NY  
10/26/2010  
7:30 AM – 5:00 PM

College and university campus public safety officers and state, local and tribal law enforcements officers who work closely with campus public safety will want to attend this workshop. Course topics are designed to address pre-incident awareness and prevention as well as to provide the participant with the knowledge and background of terrorist and criminal extremist techniques. Participants are also provided with information useful in recognizing terrorist and criminal extremist groups and individuals.

---

= Lodging provided.

(You are only eligible for lodging if your residence and official work station are more than 50 miles from the training center and you are a State or Local Agency First Responder from New York.)

Incident Response to Terrorist Bombings AWR-130
Ramada Inn, Oriskany, NY
10/26/2010
12:00 PM – 6:00 PM

This course provides basic instruction on response procedures for terrorist incidents involving energetic materials (explosives and incendiaries). The course includes classroom presentations that address potential terrorist bombing targets in US communities, common military and commercial explosives available to terrorists, improvised explosive devices (IED’s) and response procedures that support safe and effective operations during bombing incidents.

Initial Law Enforcement Response to Suicide Bombing Attacks (ILSERBA)
Ramada Inn, Oriskany, NY
10/27/2010
8:00 AM – 5:00 PM

This Program is for Sworn Law Enforcement Personnel only

This course was developed by New Mexico Institute of Mining and Technology, a National Domestic Preparedness Consortium member who has also developed public safety training courses such as; “Incident Response to Terrorist Bombings” (IRTB) and “Prevention and Response to Suicide Bombing Incidents” (PRSBI).

This eight-hour course is designed to provide front line law enforcement officers with the skills and knowledge to effectively interdict and respond to an imminent person-borne suicide bombing attack or an attack involving a vehicle-borne IED.

Effective response to a suicide bombing attack requires a multitude of immediate decisions on the part of law enforcement officers. These decisions include safety and legal considerations. The needs assessment for this course indicates a significant training gap in this area. ILERSBA is intended to meet those needs and deals specifically with immediate decisions and actions in face to face encounters of person-borne and vehicle-borne IED attacks.

November 2010

Medical Preparedness and Response to Bombing Incidents
Ramada Inn, Oriskany, NY
11/6-7/10
8:00 AM – 5:00 PM

This course will address a medical response to blast effects for both first receivers and first responders. You will be able to:

- Deliver and sustain a safe and effective response to bombing incidents;

= Lodging provided.

(You are only eligible for lodging if your residence and official work station are more than 50 miles from the training center and you are a State or Local Agency First Responder from New York.)

For additional information, you may go to our website at: http://www.security.state.ny.us/training/training_calendar.php
Phone: (518) 485-9453  ■  Email: training@security.state.ny.us
• Explain how to apply the lessons learned from the London bombing to help prevent and/or respond to a possible local bombing incident;
• Identify and explain the threats posed by terrorists’ use of explosives against U.S. domestic targets;
• Identify commonly used explosives;
• Recognize and identify indicators of an imminent attack;
• Recognize bombing injuries and identify appropriate treatment;
• Perform patient triage throughout bombing incident response, and engage in exercises involving triage;
• Safely conduct appropriate preventive, preparatory, and response actions during both the pre and post detonation periods of a bombing incident;
• Take strategic and command issues into consideration when engaging in planning and improvement processes related to the prevention of and response to bombing incidents;
• Take appropriate tactical and operational issues into consideration when planning for response to both pre-and post-detonation bombing incidents;
• Implement appropriate resource management techniques in response to bombing incidents; and
• Demonstrate your understanding of key response issues to a major bombing incident.

Advanced Active Shooter Scenario- Command A2S2
LIMITED SEATING

Erie County Emergency Services- Training and Operations Center - Auditorium, Cheektowaga, NY
11/9/2010 8:30AM – 4:30 PM

The A2S2 Command & Planning Course will help local, state, and federal emergency response agencies and jurisdictional leaders to develop a better understanding of the scope, issues, and complexities that would likely be applicable to a jurisdiction’s response to a complex active shooter scenario situation such as occurred in Mumbai, India, involving multiple targets, multiple attack teams, use of firearms and explosives, and the siege spanning greater than 24 hours. The course will help the participants develop an appreciation for the complexities involved in a large scale active shooter siege as well as the consequences related to multiple casualties with gunshot and/or post blast injuries (> 100, as well as multiple fatalities (> 100). ### Surveillance Detection Training for Commercial Infrastructure Operators and Security Staff

**Erie County Fire Training Academy, Cheektowaga, NY**  
**11/30- 12/2/2010**  
**8:30 AM – 4:30 PM**

This course in Surveillance Detection (SD) Plans and Operations is designed to provide a guideline for mitigating risks to critical infrastructure. Instructors explain how this protective measure can be applied to detect and deter potential threats to critical infrastructure and key resources (CI/KR) as well as the fundamentals for detecting surveillance activity.

### December 2010

#### Introduction to Port Awareness and Response Training (IPART)

**Location to be disclosed upon registration**  
**12/1/2010**  
**7:00 AM - 3:00 PM**

An introductory course providing an awareness level of the complicities involved in responding to a terrorist event inside a port. There is a geographical illustration of the significance of the port facilities, waterways, portside industry, and critical infrastructure of the Port of New York/New Jersey. An overview of the day-to-day operations and an examination of the challenges associated with securing marine terminals. Furthermore, a review of the regulations which ensure protection for the ports and the agencies enforcing them, particularly the United States Customs and United States Coast Guard. There is also an introduction to the response capabilities within the port of New York/New Jersey, particularly the New York City Police Department and New York City Fire Department. In conclusion, a discussion of the threat methodology, adversaries, risks and vulnerabilities associated with marine ports.

#### Introduction Critical Infrastructure Protection (ICIP)

**Location to be disclosed upon registration**  
**12/6-10/2010**  
**7:00 AM - 3:00 PM**

An introductory level course intended to equip members of the law enforcement and corporate security community with the skill set required deterring, detecting, and identifying potential terrorist activity. This course also introduces the student to the principles of threat and vulnerability assessment (an examination of the vulnerabilities associated with commercial and critical infrastructures).
with the infrastructure of a facility), basic methods of security, and the major components of a municipality’s critical infrastructure.

**Online Training Highlight**

**Medical Effects of Primary Blast Injury**

1.00 Hours

**Description**

The frequency of pre-hospital emergency response and delivery of health care following detonation of an explosive agent is becoming increasingly prevalent. This course is designed to familiarize medical responders with treatment considerations and evaluation techniques which may assist in that response.

**Delivery Location**

At participant's desired location via the Internet [www.teexwmdcampus.com](http://www.teexwmdcampus.com)

**Residential Consortium Training Highlight**

**Respiratory Protection: Program Development and Administration (RP)**

formerly known as WMD Respiratory Protection (RP)

**Course Provider:** Center for Domestic Preparedness  
**Course Length:** 16.0 hours  
**Course Delivery:** Residential Training  
**Course Level:** Performance  
**Continuing Education Units:** 1.6  
**Course Description**

This course provides the participant with an overview of the history of respiratory protection; seminars on how to read, understand, and apply the Code of Federal Regulations (CFR) standards relating to respiratory protection; and hands-on practical exercises using the participant’s knowledge and skills in performing qualitative and quantitative fit testing with respiratory protection devices with the ability to interpret the test results. The participant also learns how to develop, implement, and sustain an individual respiratory protection program for his/her department and/or jurisdiction.
