ACT FAST! to STOP STROKE

Stroke Awareness Workshop for Emergency Medical Professionals

Stroke is the third leading cause of death, and the number one cause of disability in America. But if patients are treated quickly, risk for permanent disability and death is greatly reduced.

Objectives
- Increase the understanding of pathophysiology of stroke/TIA
- Improve the evaluation of symptoms and recognition of stroke/TIA
- Learn about the crucial role that EMS plays in improving treatment times and outcomes of stroke patients!

October 27th 2011
9:00 am – 1:00 pm

Phillips Ambulatory Care Center
10 East Union Square
2nd Floor Conference Room
