TRAINING BULLETIN

 EMS Operational Spotlight: MCI EMS Operations & Triage

Course Description:

Multiple-casualty incidents (MCI) can be difficult to manage and may frustrate even the most seasoned EMS provider in the absence of a systematic triage, treatment, and transport approach. The ability of an EMT to transition from day-to-day operational goals to the unique needs of an MCI is not done easily. Initial bad scene management by EMS can quickly create more of a disaster than first encountered.

Join Jeff Meade, NREMT-P/CIC, Director of Phelps Memorial Hospital Center’s Hoch Center for Emergency Education in a discussion of EMS operations during an MCI, as well as a review of the triaging of victims in the face of limited resources. This presentation is intended to help EMS personnel better understand how to utilize resources most efficiently, triage objectively, and maximize patient outcome.

This course may be applied toward Preparatory, Patient Assessment, Trauma, or Elective CME hours under the NY State DOH EMS Continuing Education Recertification Program.

Date(s) / Time(s): Wednesday, March 14, 2012, 1900 - 2100

Targeted Audience: NY State Certified Emergency Medical Services Personnel

Program Location: Westchester County Department of Emergency Services Training Center
4 Dana Road, Valhalla, NY 10595

Program Cost: None
