Clinical Experiences

Students engage in patient-centered experiences that challenge and develop their critical thinking, problem-solving, and professional responsibility skills. Clinical experiences are designed to provide hands-on learning opportunities that enhance students' understanding of the healthcare environment.

Patient Simulation Setting

Students are immersed in real-world scenarios that prepare them for the challenges of patient care. Simulation settings provide a safe environment for students to practice and refine their clinical skills.

Learning Environment

Our learning environment is designed to foster a sense of community and collaboration among students. We have state-of-the-art facilities and resources to support our students' educational needs.

Comprehensive Clinical Rotations

Students have the opportunity to rotate through a variety of clinical settings, including hospitals, clinics, and community health centers. This comprehensive approach ensures that students receive a well-rounded education.

We Begin...
Learning Environment

The Center for Learning and Innovation (CLI) is a unique, state-of-the-art facility that promotes student learning, teamwork, and critical thinking. Unlike traditional institutions, CLI offers our students comfortable, small group educational venues that are organized to facilitate teamwork, discussion, and debate. Located just minutes from several major highways, our facility offers plenty of free parking. On premise student conveniences include: student computer and communication stations, medical library, and on premise café.

Inter-professional Education

Healthcare in the 21st century requires, if not demands, that paramedics work as part of a healthcare team. Individuals from across the North Shore-LIJ Health System, as well as from across the country, come to CLI for a variety of educational experiences. As a result, students will encounter and interact with professionals from disciplines that span the entire healthcare continuum. How better for students to learn and understand their integral roles within a healthcare team?

Current Program Information

Program Size
The Paramedic Program will be limited to twenty-four (24) participants.

Program Duration
This is a twelve (12) month program and all course clinical objectives must be completed prior to the scheduled New York State Practical Skills Examination.

Program Tuition
For current program tuition, please visit our website.

Mandatory Malpractice/Liability Insurance
All accepted candidates are required to provide proof of coverage for malpractice and liability in the minimum amount of $1,000,000 per occurrence/$3,000,000 total. Proof of coverage must be submitted prior to the first session indicating coverage past program completion.

Open House Sessions
The Center for Learning and Innovation will be conducting a series of Open House Sessions for prospective applicants. Interested individuals are welcome to stop by and tour the facilities, as well as meet program faculty and developers. Please visit our website for dates and times.

Please contact the Center for Learning and Innovation (516) 396-6150 for dates and times.

Application Fee
A non-refundable application fee of $100 is due upon submission of the application. The fee covers the cost of applicant processing, verification of EMT Certification and Driver’s Licenses, as well as criminal background investigation.

Program Eligibility
• Must have valid New York State Driver’s License or equivalent.
• Must have high school diploma, or equivalent.
• Must be eighteen (18) years of age or older.
• Must pass criminal background investigation verifying candidate is in compliance with Section 800.6(f) of the State EMS Code.
• Have at least one (1) year active paid experience as an EMT with a 911-based Emergency Medical Services (EMS) agency (three or more years experience is preferred.)
• Have valid EMT-B or higher credentials with expiration date that is past anticipated Paramedic Program Completion date.
• Successful completion of written general EMT knowledge and math assessment.
