Presents:

Bob Page

Nationally Renowned Presenter of Rapid 12-Lead Interpretation

Saturday, March 15 2014
12 Lead ECG Interpretation Workshop
A Nationally acclaimed course adopted by the Critical Care Paramedic Course curriculum at the University of Maryland, Baltimore County.
Topics covered in this Course include:

- Proper Lead Placement
- Axis and Hemiblock determination
- Bundle Branch Blocks
- Differentiating Wide Complex Tachycardia
- Myocardial Infarction recognition
- 15 lead ECG

The course includes a workbook with practice problems and handy charts for rapid use in the field. Participants in the program will read about 200 12 lead ECG’s gaining both experience and confidence in their newly learned skill.

Sunday, March 16 2014
Slap the Cap: The Role of Capnography in EMS
You will be participating in one of the first nationally presented courses on capnography in emergency medicine. This comprehensive course is designed to supply you with the knowledge background necessary to understand the full spectrum use of capnography as a diagnostic tool. Just as the 12 Lead ECG is a diagnostic tool for acute coronary syndromes, capnography is a diagnostic tool for ventilation and perfusion. It is an objective, fast, and accurate way to triage, assess and monitor the ABC’s in almost all aspects of the emergency medicine. This handout, while informative alone, is designed as a supplement to Bob Page’s Course: Slap the Cap, which offers far more extensive practice, case presentations and explanations.
Topics covered in this Course include:

- The principles behind CO2 measurement.
- The various methods of EtCO2 measurement
- Technology of EtCO2 measurement
- Identify the components of a normal and abnormal capnogram waveform.
- Clinical applications of capnography.

COST:
The cost for the course is $50.00 per day
Credit cards accepted

COURSE LOCATION:
North Shore University Hospital
Rust Auditorium
300 Community Dr,
Manhasset, NY 11030
