EMS Spotlight: Pediatric Respiratory Emergencies

**Course Description:**

Children are not just mini adults; there are vast differences not only in anatomy, but how they are assessed. Knowing and appreciating these differences are vital in accurately treating some of our most challenging patients, especially when it comes to respiratory illness.

Join Guy Singer, RRT/EMT, as he illuminates the differences between pediatric and adult patients. This class will “sprout” your knowledge of common respiratory problems that we can encounter in children, as well as reviewing vital signs and important tips and techniques for performing respiratory assessments on pediatric patients.

This course may be applied toward Pediatric Core or General Elective CME hours under the NY State DOH EMS Continuing Education Recertification Program.

**Date(s) / Time(s):** Wednesday, July 31, 2013 from 7:00pm-9:00pm
