ACROSS

1 Pregnancy complication characterized by severe hypertension, convulsions and coma.

4 The largest portion of the brain.

6 The ability of the heart muscle cells to generate an electrical impulse.

8 Method designed to stop all blood flow past the point at which it is applied.

10 A harsh high-pitched sound that can occur during inhalation or exhalation, indicative of a partial upper airway obstruction.

11 A stretcher that separates in two and can be used to pick up and carry patients.

13 An inadequate blood supply to an organ or part of the body, especially heart muscle.

14 Length of time from conception to birth.

15 Tissues that connect bones to the skeleton.

DOWN

2 Respiratory condition caused by inflammation of a lung secondary to infection.

3 Imaginary line drawn vertically from the middle of the armpit to the ankle.

5 Bruising around the eyes indicative of a basilar skull fracture.

7 Absence of any breathing or respiratory effort.

9 Tissues that connect muscles to the skeleton.

10 A metal or plastic basket designed to move patients over uneven terrain.

12 Existing at birth.
