“OMG!” CME Series

Understanding Methamphetamine and the Medical Implications of Meth Lab Encounters

Course Description:

Unlike the TV reality of Breaking Bad, meth Labs don’t all live in the desert far away from densely populated areas. Clandestine drug manufacturing is regularly located in urban and suburban settings. The process is rarely clean and often injuries and illness result. The EMS providers who knowingly or unknowingly find themselves in such an environment need the ability to recognize the danger and the knowledge to protect themselves while still caring for their patients.

Join Jeff Meade, EMT-P/CIC/RF, in a review of methamphetamine, its uses, both legal and recreational, and will discuss the dangers of a clandestine drug lab and an encounter with one.

This course may be applied toward Pharmacology, Toxicology, Operations or General Elective CME hours under the NY State DOH EMS Continuing Education Recertification Program.

Date(s) / Time(s): Thursday, October 16, 2014 from 7-9pm

Targeted Audience: All First Responders

Program Location: Westchester County Department of Emergency Services
4 Dana Rd, Valhalla, NY 10595

Program Cost: None

Registration: Pre-registration is mandatory. Walk-ins are not permitted. Class size is limited.

Send an email directly to emsedu@westchestergov.com. You MUST provide: name, agency, cert level, contact phone number, email address, and bulletin #.
