Aphasia Awareness Training for Emergency Service Providers

Avi Golden was a practicing EMT and former Critical Care and Flight Paramedic with North-Shore LIJ and NY Presbyterian EMS. After experiencing a stroke in 2007, resulting in aphasia, Avi now educates the medical community and advocates for aphasia awareness.

What is Aphasi and what causes it?

How can EMS communicate with this type of patient?

Avi’s presentation will cover his life before and after stroke, his exciting adventures after acquiring aphasia, helpful communication techniques, and a question and answer session.

Join Paramedic Avi Golden on January 29th from 7P-9P at Flushing Hospital Medical Center in the main auditorium located on the 5th floor to learn more.
