Empress EMS Service
Invites All Field Personnel to:

CARBON MONOXIDE POISONING FOR EMERGENCY RESPONDERS

Tuesday, 27 Jan ‘15
1830-2100
722 Nepperhan Ave
Yonkers, NY 10703

Light refreshments will be provided.

Carbon monoxide poisoning is the second leading cause of poisoning in the United States. CO is as dangerous to rescuers as it is to the public and yet training on it remains insufficient. This 2 hour class covers pathophysiology, sources of exposure, signs and symptoms, treatment and specific dangers to rescuers. All provider levels will leave with the knowledge they need to keep both themselves and their patients safe from the “silent killer”.

Don’t delay! Classes fill quickly!
