Greetings,

As you are aware, some ePCR vendors have had challenges meeting the validation programming and reporting requirements of NYS EMS. It seems as though communication of these challenges may be variable.

NYS EMS has scheduled Webex Events with some of the ePCR software programs for this coming week to openly discuss these challenges and assure awareness of them. All agencies are asked to participate in these public webinars for transparency and so that a collaborative plan can be formulated amongst all parties to rectify these issues.

You are more than welcome to attend any / all of the scheduled meetings and hope that you will encourage your EMS agency leadership to attend the meetings and learn more about their software platform and what changes may have been implemented or will be shortly to adapt to the documentation standard change. We have invited the listed CEO of each EMS agency on record with the respective software platform and the ePCR contacts on record.
